

## Secure IT Asset Disposition

ITAD (IT Asset Disposition) is an increasingly important component of Asset Life Cycle management. In today's IT world security of data is paramount. Data breaches can bring an organization to its knees. As a result, the secure destruction of HDD (and magnetic tape) data is critical to your organizations success. At the same time, the residual value of your used hardware assets could provide funding to be used to support other objectives. Therefore, it's vital to choose a proven provider of IT Asset Lifecycle Transition Services. In the ITAD (IT Asset Disposition) industry, there are still too many providers without R2, WEEE or e-Stewards certificated solutions. ITAD provider negligence and resulting horror stories are not uncommon. Cumulus Solutions Group takes absolutely no risks; but instead, facilitates R2 or WEEE, ISO 14001 and ISO 45001 certified e-waste solutions, with full reporting. The fair and proper valuation of your retiring hardware is taken no less lightly.

### Cumulus Solutions Group's Mission

With more than 30 years of experience, Cumulus Solutions Group provides secure ITAD (IT Asset Disposition), Data Center Site Services (i.e. Smart Hands, IMAC)) Data Center Migrations and Data Center Relocation for global and US-based clients, across all industry verticals. With an emphasis on proven methodologies and proprietary tools, such as SkyCommand<sup>SM</sup> (its client management portal), the company promises seamless IT infrastructure and IT lifecycle transitions designed to help you sleep at night.

## ITAD (IT Asset Disposition) – Service Summary

Cumulus Solutions Group provides full IT Asset Disposition support to clients, worldwide. Primarily focused on enterprise IT hardware (servers, storage and networking), the company has meticulously vetted all downstream partners, ensuring the smooth facilitation of each service stage, ensuring partner certifications that are R2 or WEEE, ISO 14001 and ISO 45001. Service models are designed with flexibility in mind, offering onsite or off-site initial handling, to maximize security and proper data destruction to DOD specifications. Certificates of proper data destruction are provided for all selected/audited IT assets and additional reporting for other stages of the ITAD process can be as detailed as requested and provided as frequently as required. Asset valuation, or discovering residual value for whole systems or systems parts is addressed with the same importance as data security and chain of custody. Solid IT Asset Lifecycle Transition Services are possible only when the ITAD provider has established methodologies, detailed reporting and downstream partners with whom formal and contractual support is 100% accountable. Cumulus Solutions Group offers what you require.

## ITAD – Service Features

- Secure onsite or offsite data wiping to NIST 800-88 wiping standards with documented data destruction certifications
- Full facilitation of R2 or WEEE and ISO-certified ITAD process with meticulously-vetted downstream partners
- Remarketing/re-purposing or re-deployment when global market valuations permit such. Or, full asset recycling or environmentally-responsible component disposition to globally accepted standards when market value doesn't exist
- Detailed and/or customizable reporting
- Prior to, during or following any IT Asset Disposition project, Cumulus Solutions Group is also able to provide Data Center Site Services (i.e. Smart Hands, IMAC), Data Center Relocations or comprehensive Data Center Migrations.

## ITAD – Service Benefits

- 24x7 support from native-language speaking project managers
- Full-service process from de-install, packing, transportation, data erasure/disk destruction, testing and auditing, resale or recycling and certificate delivery
- Secure chain of custody processing and handling
- Detailed documentation/reporting, with customizable reporting
