| Action Required | Outage | **For Your Awareness** |

For Your Awareness:

As part of the xxxxxx Data Center transformation project, several migration events are being scheduled to forklift servers to the new Data Center. These events will occur over the next few months and will be completed by the end of April. If you have an application that has a dependency on any of the servers in scope your application will be impacted and you will be receiving additional communications.

What It Means to You
- Your impacted applications will be assigned a migration event.
- If you have an application hosted on an in-scope server, you will be contacted 6 to 8 weeks in advance of any outage to begin planning activities.
- Application owners will be responsible for shutdown, startup, and pre/post-migration testing activities.
- Your application will be unavailable during the 48-hour migration window.
- There will be additional communications from the project team during the run-up to the migration event.

Background
The migration activity is designed to provide Technicolor with a state of the art Data Center capable of meeting our current and future needs.
